Holly Lippert

As you know, Sakonnet Preservation Association (SPA) is committed to preserving the unique character of Little Compton by protecting open space. Thanks to the generosity of landowners like you and the dedication of our volunteer staff, we currently hold conservation easements and own fee properties totaling over 400 acres.

During my visit on _____, I performed a visual inspection to monitor the activities on your property as they pertain to the terms of your conservation easement. This letter will serve as a record that my monitoring did not reveal any activities that conflict with the terms of your easement. A copy of this letter will be placed on file in SPA's office as well as in our archives.

To assist us in our easement administration and stewardship efforts in the future, please notify SPA of any anticipated changes in land ownership (such as a sale, transfer or lease) or if you plan any construction, renovations or landscape improvements on your protected land. Depending on the terms of your easement, certain activities specified in your easement as reserved rights may require notice to and/or approval by SPA prior to undertaking the planned action. Abby Brooks, SPA President, or Heather Steers, Stewardship Committee Chair, would be most willing to discuss the details of your easement with you. In addition, please feel free to contact SPA about any land management issues relevant to your conserved land.

Thank you for your continued commitment to land conservation in Little Compton and your generous support of SPA. I wish you and your family the best in the coming year.

Sincerely,

Monitor

Heather Steers, Stewardship Chair
