RHODE ISLAND
LAND & WATER
CONSERVATION
SUMMIT

Agenda

7:45 – 8:30  Registration & Continental Breakfast

8:30 – 9:40  Welcome — Emcee: Judith Swift, URI Coastal Institute
• Keynote: Gus Seelig — Executive Director, Vermont Housing and Conservation Board
  “Building Community Through Conservation: Lessons from 30 Years”

9:40 – 10:20 Business Meetings (everyone invited); Network & Visit Exhibits
  9:45 – 10:05  Business Meetings (everyone invited):
    • RI Land Trust Council Business Meeting—Atrium I
    • RI Association of Conservation Commission Business Meeting—Atrium II
    • Watershed Organizations’ Meeting—Senate Chambers

10:20 – 11:30  Session I Workshops — Your choice from 11 offered
11:30 – 11:45  Break
11:45 – 12:55  Session II Workshops – Your choice from 11 offered

12:55 – 2:30  Lunch & Awards
  • Peter Merritt Conservation Award
  • Blueways Stewardship Award

  Celebrating years of dedication to land and water conservation—two success stories:
  • Alicia Lehrer, Woonasquatucket River Watershed Council
  • Melissa Horne, Barrington Land Conservation Trust

2:45 – 4:00  Session III Workshops — Your choice from 10 offered
“A true conservationist is a man who knows that the world is not given by his fathers, but borrowed from his children.”

- John James Audubon
Grassroots conservation organizations play a central role in protecting Rhode Island’s waterways, open spaces, farms and historic vistas. Rhode Island is fortunate to have over 45 land trusts, a dozen watershed organizations and numerous conservation commissions that rely on the expertise and passion of hundreds of volunteer conservation leaders.

Since 2004, the RI Land & Water Partnership has worked to build the capacity and foster connections between these dedicated grassroots organizations. The RI Land & Water Partnership is led by Meg Kerr and Rupert Friday in collaboration with many partners from leading conservation organizations.

The RI Land & Water Partnership recognizes that each community based conservation organization is unique, comprised of local advocates who understand the issues in their community and cultivate local support for their conservation work.

The Partnership also recognizes that grassroots conservation organizations have much in common - each organization faces similar land and water conservation issues and has similar governance, public relations and other administrative activities.

Through the years, the Partnership has demonstrated that local conservationists can learn and work together to strengthen land and water protection throughout the state.

Each year, the RI Land & Water Partnership hosts the Land & Water Conservation Summit in March. The Summit’s purpose is to help build the skills and foster connections that local conservation leaders need to be more effective.

The Partnership’s web site, www.landandwaterpartnership.org, stores a wealth of information from past summits and workshops.

The website is also home to an on-line library of resource materials created in collaboration with the RI Conservation Stewardship Collaborative. This is a web-based collection of “how to” information to support land and water conservation stewardship.

The library contains land stewardship tools including: information on baseline documentation, easement monitoring, management of invasive species, and habitat restoration strategies; watershed stewardship tools including information on Blueways (water trails) and water quality monitoring; and tools for organizational support.

Please check it out and send us your feedback:

**Land & Water Conservation Summit**

**Fifteen years and counting….**

The annual *Land & Water Conservation Summit* is the Land & Water Partnership’s flagship event. The Summit has been held yearly since 2004 and is possible because dozens of conservation leaders and experts in organizational development (fundraising, board development, public relations) are willing to spend their Saturday sharing their expertise and latest ideas with their colleagues and friends. The Summit is held in March and is widely acknowledged as Rhode Island’s go-to conference for workshops and networking with other grassroots conservation leaders.

**Where we started**

Rhode Island’s land trusts held an annual conference since 1999. In 2004, the RI Land Trust Council invited watershed organizations and conservation commissions to join the conference and created the *RI Land & Water Summit*. The first *Land & Water Summit* was held at the North Kingstown High School. Partner organizations set up displays in the school’s atrium. Lunch was served in the school cafeteria. The energy and enthusiasm for this joint conference was terrific.

In 2005, the conference was moved to the URI Memorial Union where it has remained. The Summit has grown into the state’s premier conservation event, attracting over 300 conservation leaders from Rhode Island and neighboring New England states for a day of learning and networking.

**Summit Keynote Speakers**

Each year we recruit a keynote speaker for the Summit who can provide summit participants with timely information and inspiration for continuing our work together.

Roster of keynote speakers and their topics:

2004  **Gus Seelig**—*Keys to the 15 year Success of the VT Housing & Conservation Program*

2005  **Peter Forbes**—*The Soul of the Land – Nurturing Our Emotional Connections to Our Communities, Landscapes and Watersheds and Telling Stories that Celebrate These Relationships*

2006  **Jeff Milder**—*Using Development to Support Conservation – How to Leverage the Real Estate Market to Help Fund Conservation Projects*

2007  **Richard Greenwood**—*Powerful Currents – A Historical Perspective on Rivers and the Making of Rhode Island*

2008  **Gina McCarthy**—*No Child Left Inside*

2009  **Tom Wessells**—*Reading the Forested Landscape – A Natural History of New England*

2010  **Tom Horton**—*Saving the Chesapeake Bay’s Land and Water – Lessons Learned after 25 years*

2011  **Steve Sloan**—*Connecting People to Place and Your Conservation Mission*

2012  **Mayor Lisa Wong**—*Urban Conservation as a Redevelopment Strategy*

2013  **Steve Archibald**—*Not a storyteller? Perhaps it’s time to reconsider!*

2014  **Alvaro Sanchez Sanchez**—*Building Strong Green Economies Using Land & Water Conservation Strategies*

2015  **Peter Forbes**—*Innovation & Evolution in Conservation*

2016  **Collin O’Mara**—*Conservation in This Century; What America Can Learn from the Ocean State*

2017  **Eric Chivian, M.D.**—*Medical Models for Helping Us Understand Global Environmental Threats*

2018  **Gus Seelig**—*Building Community Through Conservation: Lessons from 30 Years*

Going Greener

**Help us “green” the Summit!**

*Everyone is at the Land & Water Conservation Summit to talk about conservation — “talking the talk.”*

*With your help, the Summit is also “walking the walk” — with green practices for this annual event.*

**What we’re doing:**

- We are giving a **reusable ceramic coffee mug** made by local artist John Vierbickas to everyone who attends the Summit **instead of providing bottled water and disposable coffee cups**. We have washed these mugs so you can use yours for water and coffee during the Summit. This reduces the volume of waste we produce and supports a local artist.

- We are partnering with People’s Power & Light to **offset carbon emissions** from the Summit **with renewable energy**. The electricity for this event has been matched by local, clean power.

- We are reducing the amount of paper used at the Summit by **encouraging on-line registration** and by eliminating the folders previously distributed to each participant.

- We asked University of Rhode Island Catering to **support local farms** by purchasing local fruit and using locally grown greens in the salad for lunch.

Your Environment. Designed.
Turning creativity into places. Imagination into cleaner air and water. Ideas into communities.
A world designed with infinite possibilities, all through landscape architecture.

www.riasla.org
Together, we are permanently protecting the open spaces and special places that we love - places that define the character of our Ocean State - so they can be enjoyed by future generations.

Because land trusts are strongest collectively, the Council:

~ advocates for sound public policy as the voice of Rhode Island's land trusts,
~ promotes collaboration and the exchange of ideas among land trusts,
~ helps individual land trusts improve their ability to protect and manage land, and
~ spotlights land trust achievements so that more Rhode Islanders may benefit.

The Council's initiatives help Rhode Island's land trusts accomplish their conservation goals, boost the impact of individual efforts, and ensure the benefits of this work remain for everyone to enjoy.

Right now, the Council is:

~ advocating in the State House for bond funds to help land trusts save more land,
~ influencing legislation in support of farming and to reinforce conservation easements,
~ providing training for land trusts in their stewardship and administrative duties,
~ facilitating strategic alliances among land trusts to overcome conservation challenges,
~ removing barriers to hiking the trails in our state with ExploreRI and ParkRx,
~ making plans for Land Trust Days again this year so that hundreds of Rhode Islanders may enjoy the special places land trusts protect,
~ convening Rhode Island's land trust community with learning and networking opportunities right here today at Summit!

On behalf of the Council, thank you for all you do to make conservation happen in our beautiful state, Rupert Friday and Members of the Board

THE CONSERVATION FUND

Learn more at: conservationfund.org
RIEEA is a collaborative network of individuals and organizations committed to environmental education. Our membership includes:

- teachers
- naturalists
- environmental organizations
- land trusts
- educators from universities, recreation centers, and state, federal, and non-profit agencies

...all working to protect, enrich and restore the world around us.

RIEEA has access to a range of resources and has proven ability to build strong partnerships across a variety of sectors necessary to successfully advance environmental literacy in Rhode Island.

Please visit [www.rieea.org](http://www.rieea.org) to learn more about our upcoming events, membership benefits, resource guide, monthly meetings, job postings, and much more.
Facilitation
To facilitate is to make possible, to ease, to assist.

Need help articulating a more realistic and exciting future or to solve a specific organizational problem or question? We provide strategic facilitation services to small, locally-based organizations focused on environmental stewardship.

Find us at www.lighthousecg.com or call me, Mark Amaral, at 401-682-7026.

Land & Water Conservation Awards

Peter Merritt Award
for Land Conservation
Awarded by RI Land Trust Council

The Peter Merritt Award for Land Conservation is given to recognize a volunteer—a dedicated “in the trenches” individual—who is making an outstanding contribution to land conservation in their Rhode Island community.

The Award honors the late Peter Merritt (1943–2000), a founding and dedicated Board member and second president of the Aquidneck Land Trust. Peter worked ceaselessly to establish a vision for land conservation on Aquidneck Island and to marshal the Island’s citizens, municipalities and financial resources toward implementing that vision. He was an eloquent, articulate spokesperson for the need—and the immediacy of the need—for sustainable land conservation. Peter advocated for open space preservation tirelessly. Wherever he was, his enthusiasm and persuasive arguments were a catalyst for action that changed our landscape forever. Peter is described as one part visionary, one part organizer, and one part trench negotiator. Yet, Peter was always the first to give credit and praise to others for the land trust’s accomplishments that he so often led.

We celebrate Peter’s spirit and enthusiasm with this Award in his honor.

Blueways Stewardship Award
Awarded by the Rhode Island Blueways Alliance

The mission of the Rhode Island Blueways Alliance is to develop a water trail network linking Rhode Island’s rivers, lakes and ponds to Narragansett Bay and to use the trail to promote safety, conservation, recreation and economic development.

The Blueways Stewardship Award was created in 2010 to recognize an individual who exemplifies dedication to the stewardship and conservation of Rhode Island’s rivers, lakes and coastal waters.

The Blueways Stewardship Award is given to an individual who has the respect of their peers and who has notable accomplishments in watershed management in any of the following areas:

- water quality monitoring and protection,
- development of trails on water,
- promoting land use that protects waterways,
- working to make connections between watershed conservation and their community.

Past recipients: Lisa Aurecchia (Woonasquatucket River Watershed Council, 2016)
Denise Poyer (Wood Pawcatuck Watershed Association, 2015)
Judy Colaluca (Save The Lakes, 2014), Caroline Wells (Town of Warren, 2013)
Paul Earnshaw (Buckeye Brook Coalition, 2012), Eugenia Marks (Audubon Society of RI, 2011)
Frank Matta (Blackstone River Watershed Council/Friends of the Blackstone, 2010)
Art Ganz (Salt Ponds Coalition, 2017)
Thank you for making our community a better place

Life’s better when we’re connected®
Keynote: Gus Seelig

Building Community Through Conservation: Lessons from 30 Years

Gus Seelig has served as the Executive Director of the Vermont Housing & Conservation Board (VHCB) since its inception in 1987.

Under his leadership, VHCB has invested $310 million in state funding to develop or rehabilitate more than 12,500 affordable homes, to conserve 700 farms encompassing 160,000 acres and 265,000 acres of natural areas and recreational and forest lands and supported restoration of over 60 historic buildings for community use.

Previously, Gus was Executive Director of the Central Vermont Community Action Council (a low-income advocacy and community development organization); has served on the Affordable Housing Program Advisory Board for the Federal Home Loan Bank of Boston; and was Chair of the Vermont Energy Investment Corporation. Gus has a B.A. from Goddard College and completed the Harvard University’s Program for Senior Executives in State and Local Government.

Vermont Housing and Conservation Board (VHCB) was established in 1987 with dual goals of creating affordable housing for Vermonters, and conserving the state’s agriculture and recreation land, forestland, natural areas and historic properties. In addition, they focus on keeping conserved agricultural land in production and affordable for future generations of farmers.

For 30 years, VHCB has been a forerunner in the nation in pioneering strategies and programs to achieve these goals. A central part of the Board’s mission has been to support the building of capacity by non-profits to both develop projects and steward resources.
Thank You to these Sponsors of the 2018 Land & Water Conservation Summit!

The Nature Conservancy

Protecting nature. Preserving life.

the promise of nature

nature.org/rhodeisland
Workshops – Session I  10:20 – 11:30  choose from 11

1.A  Stream, River and Bay-Friendly Homes: Working with Communities to Install Residential Scale Green Infrastructure
    Alicia Lehrer - Woonasquatucket River Watershed Council  alehrer@wrwc.org
    Sara Churgin - Eastern Rhode Island Conservation District  schurgin.ericd@gmail.com
    Bob McMahon - Formerly Providence Parks  mcMahon4@cox.net

Stormwater management can begin at home with rain barrels, rain gardens, permeable pavement and other strategies. The Woonasquatucket River Watershed Council developed successful strategies for engaging homeowners in stormwater management which are being replicated in communities on Aquidneck Island by the Eastern RI Conservation District. Homeowner and community interest is building throughout the state. Workshop participants will learn how they can help their own communities get started and build on the home stormwater retrofit movement.

1.B  Partnering with Environmental Organizations and Schools
    April Alix - Providence Parks Urban Wildlife Refuge Partnership  april@providenceparks.org
    Rachel Holbert - Norman Bird Sanctuary  RHolbert@normanbirdsanctuary.org
    Kassi Archambault - Woonasquatucket River Watershed Council  karchambault@wrwc.org

Learn how your organization can effectively partner with environmental educators and schools to ensure long-term programming that strengthens your message and reach. Three environmental educators will share how they have engaged schools and teachers from multiple districts, and their “tips and tricks” for building teacher confidence in leading walks outdoors. Presenters will discuss successful partnerships and delve into specific examples of how collaboration brought about stronger programming for all.

1.C  Raising Major Gifts
    Sarah Shrewsbury - Vineyard Consulting  sarah@vineyard-consulting.com

Need to raise major gifts for the gorgeous parcel you want to preserve or an important project? In this presentation, you will learn how to identify, cultivate, solicit, close, and steward major gift donors. We will also cover suggested language to use when asking for an appointment, for a gift, as well as responding to a variety of donor responses. You will learn what motivates donors to make major gifts, how to approach family foundations, the importance of bequests.

1.D  Sacred Waters, Honoring the Gifts an Indigenous Perspective
    Lorén Spears - Tomaquag Museum  lorenspears@tomaquagmuseum.org

Lorén, a Narragansett Tribal member will share the cultural, spiritual, environmental, historical and contemporary uses of local waterways. She will illustrate the changes in the landscape and uses over time, as well as the impact on the people.

1.E  Board Boot Camp 101: Board Member Roles & Responsibilities
    Jill Pfitzenmayer - The Rhode Island Foundation  jpfitzemayer@rifoundation.org

A nonprofit board of directors is responsible for defining the organization's mission and for providing overall leadership and strategic direction to the organization. This workshop will offer new and experienced board members with an overview of the governance, finance, fundraising and planning roles which lead to an effective board of directors. Participants will leave with tools and templates to improve the function and effectiveness of their board.

1.F  Connect with Your Audiences through Effective Messaging
    Jennifer West - Narragansett Bay Research Reserve  jennifer@nberr.org

We all want the ability to develop and express strong messages that are heard and acted upon by our audiences. This session will provide tips, tricks, and insights on how to craft messages and tell stories that are clear and compelling. Whether you’re training volunteers or preparing articles for your newsletter, this session will help strengthen your communication skills and ability to hone messaging that truly engage your audiences’ hearts and minds.
Clean Energy, Clean Air.

People’s Power & Light is a Rhode Island non-profit working to harness the collective power of energy consumers to speed the transition to a low-carbon future. Join our thousands of members who combat climate change by choosing to green their electricity.

Make the switch.
Choose 100% local renewable energy for your next electric bill.

www.ripower.org/green

PEOPLE’S
Power & Light

The Narragansett Bay National Estuarine Research Reserve (NBNERR) Coastal Training Program (CTP) provides decision-makers with the science-based information and skills needed to address critical local resource management issues. Municipal staff and officials, designers and developers, landscape architects, engineers, attorneys, natural resource managers, and non-profit conservation organizations all benefit from the program.

Coastal Training Programs range from participatory workshops to hands-on skills training and focus on issues and topics such as:

- Habitat protection
- Water quality
- Climate change
- Science communication
- Stakeholder engagement

For more information please contact:

Jennifer West, CTP Coordinator
401-222-4700, x 7413 | jennifer@nbnerr.org

---

Northeast Region
RI DEM
Audubon Society of Rhode Island
National Estuarine Research Reserve System
*Scott Millar - Grow Smart Rhode Island  smillar@growsmartri.com*  
*Erika Niedowski - Acadia Center  eniedowski@acadiacenter.org*

Rhode Island has ambitious and worthy goals for reducing greenhouse gas emissions. Expanding renewable energy is critical to meeting these goals. This workshop will review what Rhode Island and other states are doing to expand renewable energy development while reducing impacts to farm and forestland. Attendees will hear about legislation in play in 2018 and engage in discussions of strategies for increasing incentives for siting renewable projects on brownfields, landfills, rooftops and other developed sites.

1.H  Understanding the Complexities of Renewable Energy in Rhode Island  
*Jerry Elmer - Conservation Law Foundation  jelmer@elf.org*

Expanding renewable energy is critical to Rhode Island’s climate mitigation strategies. Energy policy has its own language and programs – distributed generation, net metering, renewable energy fund, PACE, EERMC, PUC. This workshop will decode energy policy and renewable energy programs and highlight priorities for moving the effort forward in 2018.

1.I  Invasive Species: What Do We Do and How?  
*Carol Lynn Trocki - Conservation Consultant, Mosaic Land Management LLC  and RI Land Trust Council  cltrocki@gmail.com*  
*David Gregg - Rhode Island Natural History Survey  dgregg@rinhs.org*

What makes a species invasive and why does that matter? We know they are a problem, but our time and money is limited, where do we even start? In this workshop we will explore the way we frame our approach to managing invasive species in the landscape, and discuss realistic strategies given competing interests and limited resources. We will focus on invasive plant species in particular, but many of the concepts apply to animals as well. Time will be allocated for sharing what’s worked and what hasn’t. Our goal is that you leave feeling empowered, rather than overwhelmed, by this daunting issue.

1.J  Working with Landowners and Third Parties to Prevent Future Problems  
*Alex Chuman - Aquidneck Land Trust  achuman@ailt.org*

Proactively communicating now with landowners of your land trust’s conservation easements can help save a lot of time and money on violations and enforcement later. Topics for this session will include developing relationships with existing landowners of conservation easements, dealing with successor landowners, and strategies to address third party encroachment/trespass from neighbors. We will use examples from Aquidneck Land Trust and hope to hear other strategies that have or haven’t worked from attendees.

1.K  Current Issues for Municipal Land Trusts & Conservation Commissions  
*Gregory S. Schultz - RI Attorney General Office  gschultz@riag.ri.gov*  
*Roy Najiecki - Glocester Land Trust  roy@najiecki.com*  
*Barbara Rich - Smithfield Land Trust  brich@barbararich.net*

When Municipal land trusts and conservation commissions protect and steward land, they must deal with different legal requirements and situations than non-profit land trusts. This workshop will discuss key legal aspects of this work for municipal organizations including: How do we deal with Rhode Island’s open meeting law and negotiate land conservation deals? How do you use Executive Sessions? How do you deal with requests for public records? What can you do to ensure the lands that you protect remain protected and are not used for other purposes in the future? Beyond legal issues, the workshop will discuss: How do you maintain good relations with the Town Council? How do you manage finances? What is the best way to contract with consultants? Join this discussion with your peers from municipal land trusts. Ask your questions and share your land trust’s strategies for success.
Clean energy is just over the horizon.

RINLA and its member companies are among the leading agriculture and landscape industry voices throughout the state and the region regarding integrated resilience and innovation, climate change and green-blue infrastructure.

RINLA members are professionals who take pride in their work and uphold the highest standards in horticulture, environmental practices, agriculture and landscape businesses.

www.rinla.org
Workshops – Session II 11:45 – 12:55 choose from 11

2.A Designing “Maintainable” Green Infrastructure
   Brian Byrnes - City of Providence  bbyrnes@providenceri.gov
   Steve Ricci - Groundwork Rhode Island  sricci@groundworkri.org

Proper maintenance of stormwater retrofits follows smart and well thought out design and construction. By designing and constructing ‘maintainable’ and sustainable stormwater best management practices (BMP’s) we can insure that the BMP is working and providing the desired result. This workshop will focus on both small and large green infrastructure BMPs and will review how to improve maintenance through smart and inclusive designs. Participants will also learn how to plan and budget for successful maintenance throughout the year.

2.B Leading Age Appropriate Outdoor Experiences for Children of All Ages
   Andrea Stein - Roger Williams Park Zoo  astein@rwpzoo.org

How do we make science and the outdoors accessible to children of all ages? This workshop will explore interpreting science across ages and (developmental) stages from preschool to high school. Participants will learn how to meet visitors where they are both as individuals and as a group to promote optimal learning and development.

2.C How to Write Killer Fundraising Letters
   David Allen - Consultant - Development for Conservation  david@developmentforconservation.com

Writing appeal letters that raise money is not hard. Writing appeal letters that raise a lot more money takes work. This workshop will explore the science of what works and why when writing appeal letters. The science may be hard to believe but the steps are easy to implement. If you follow them, your appeal letters will raise more money for your organization. These letters are better thought of as technical writing than as correspondence. And just like writing skills for many other technical purposes, there is a science to it. This workshop will explore how to start thinking about how to approach writing appeal letters that raise money and how to edit them so that they raise more.

2.D Engaging Community through Pollinator Conservation
   Vanessa Venturini - Master Gardener Program/URI Cooperative Extension  vanessa@uri.edu
   Johanna Vietry - Master Gardener & Friends of the Waterfront  jvietry@cox.net

Looking to raise awareness and increase participation in your work? Pollinator conservation projects serve as mechanisms to engage citizens in land stewardship on a residential scale. Learn basic principles of plant selection, garden design and pest control to provide food, cover and nesting sites for native pollinators. We will highlight pollinator education resources, successful demonstration projects in Rhode Island and opportunities to partner with URI Extension Master Gardeners to change behavior in your community.

2.E Board Boot Camp 201: Core Functions of a Land Trust
   Kevin Case - Land Trust Alliance  kcase@lta.org
   Chuck Toal - Connecticut Land Conservation Council & Avalonia Land Trust  chucktoal@gmail.com
   Sheila Mackintosh - Sakonnet Preservation Association  sheilamack@verizon.net

Running a land trust is complex and unique in the non-profit community, not just because we make a promise of perpetuity with each conservation easement. This workshop provides new board members with an overview of technical aspects of land protection and stewardship for both conservation easements and fee owned land. Experienced board members will learn about new trends and techniques. The workshop will cover the nuts and bolts of land protection and stewardship and discuss everything from the process of evaluating conservation projects to responding to potential violations. This workshop complements Board Boot Camp 101 on Board Member Roles & Responsibilities and Board Boot Camp 301 on Board Culture and Keeping the Board Engaged.
Proudly supporting the 2018 Rhode Island Land & Water Conservation Summit

For nearly 50 years, Save The Bay has been your steadfast eyes, ears and voice for Narragansett Bay.

savebay.org
2.F Expanding Your Reach and Impact Through Social Media Strategies
Sarah Dell - Advocacy Solutions  sdell@advocacysolutionsllc.com
The world of social media has expanded rapidly, with platforms like Facebook, Twitter, and Instagram now commonly serving as the initial point of contact (or first impression) between organizations and their potential supporters, donors, and wider-communities. With many non-profit organizations often facing budget and capacity constraints, diving into the social media world may seem unrealistic. If you or your organization is considering adding or bolstering its social media presence, this workshop will provide you with some simple tips and recommendations to consider before you digitally connect with your audiences.

2.G Understanding DEM’s Wetland Regulations and Permitting Best Practices
Chuck Horbert - RI Dept. of Environmental Management  chorbert13@gmail.com
Organizations advocating for land and watershed protection need a thorough understanding of DEM’s wetland program. This workshop will provide an overview of the state’s wetland regulations with an emphasis on best practices when working near wetlands, focusing on requirements for trails through wetlands as well as structures in or near wetland. Participants will gain insight on how to better monitor wetland activities and will improve their understanding of special provisions for agriculture and other interests.

2.H Rhode Island’s Climate Resilience Action Strategy: Update and Next Steps
Shaun O’Rourke - Rhode Island Infrastructure Bank  sorourke@riib.org
In September 2017, Governor Raimondo signed an Executive Order to launch a Statewide Climate Resilience Action Strategy. The strategy will identify and prioritize climate resiliency actions across the state, both in government and in collaboration with business, academic and nonprofit partners to better prepare Rhode Island for a changing climate. This workshop will provide an overview of the strategy development and will highlight opportunities for conservation organizations to participate and lead local implementation efforts.

2.I The Rhode Island Bird Atlas 2.0: A Conservation Tool for Land Managers
Jay Osenkowski - RI Dept. of Environmental Management  jay.osenkowski@dem.ri.gov
Peter Paton, PhD - University of Rhode Island  ppaton@uri.edu
Charles Clarkson, PhD - RI Dept. of Environmental Management  clarksonce@uri.edu
and University of Rhode Island  clarksonce@uri.edu
Bird Atlases provide data on the distribution, abundance and long-term change of bird populations within a state. Birds are effective indicators of environmental change and atlases are often employed by conservation agencies to inform land management strategies. The Rhode Island Bird Atlas is unique in that it is the first atlas to survey year-round use of habitats by birds. The collected data on the use of Rhode Island habitats by breeding, wintering and migrating birds allows scientists to model the importance of these habitat types on an annual basis. This workshop will review the current bird atlas, discuss the important conservation tools stemming from its completion and make recommendations on how conservation groups can utilize the atlas for targeted land management.

2.J Where am I anyway? Map-reading & Orienting in the Field
Carol Lynn Trocki - Conservation Consult, Mosaic Land Management LLC  and RI Land Trust Council  cttrocki@gmail.com
Charles Allott, Esq. - Aquidneck Land Trust  callott@aitl.org
Alex Chuman - Aquidneck Land Trust  achuman@aitl.org
Have you ever gone out to visit a property, gotten turned around in the woods, and realized – I have absolutely no idea where I am? Well… so have we! Come learn from the experts. Alex and Carol will share their tips and tricks for navigating in the field using aerial photo maps, a mobile device/smartphone, and (maybe?) a compass. Chuck will offer advice on reading survey plans and interpreting legal descriptions. Our focus will be directed at boundary interpretation and field navigation accessible to all, without the need for specialized software or technology.
THE WEST GREENWICH CONSERVATION COMMISSION

is happy to support the Land & Water Conservation Summit

CONGRATULATIONS ON FIFTEEN YEARS!

—2018—
2.K  Getting the Right Value! Appraisals for Land Conservation
   Jenny K. Flanagan - Keystone Consulting Group  jflanagan@keystonene.com
Come with your appraisal questions! To get things started, we’ll go over the seven items an appraiser needs to know to begin an appraisal assignment. Terms like “before and after appraisal” and “enhancement,” and difference between market value and conservation value will be discussed. We’ll also examine how various regulations for state and federal grants and for charitable donations impact what goes into the appraisal report … and even what property is valued! Then we’ll offer a case study of one property that was valued four times over the conservation process. This will offer some guidance for what to look for in an appraisal report. Finally, we'll open up the discussion and answer any questions you have about conservation valuation, appraisal regulations and how to find the right appraiser for the job.

Workshops – Session III  2:45 – 4:00  choose from 10

3.A  Creating Rhode Island's First Wild & Scenic River – the Wood Pawcatuck Study
   Denise Poyer - Wood Pawcatuck Watershed Association  denisep@wpwa.org
Since 2010 the Wood-Pawcatuck Watershed Association and its partners have been working to get national recognition of the Outprisingly Remarkable Values of seven rivers in southeastern New England – the Beaver, Chipuxet, Green Falls, Pawcatuck, Queen, Shunock, and Wood Rivers. This session will review the Wild & Scenic process, highlighting the key findings and exploring how communities throughout the watershed can benefit from the designation.

3.B  Leading Engaging Walks
   Wendy Fachon - Rhode Island Netwalking  wendyf13@cox.net
Designing, promoting, and facilitating successful walking events require thoughtful planning, effective marketing, and focusing the walk around an engaging activity and/or topic suited to your audience. Environmental educator and founder of Rhode Island Netwalking, Wendy Fachon has organized and led school enrichment field trips, after-school walking clubs, summer-school environmental education programs, and vacation week family adventures. She will provide a list of ideas and guide participants in planning around their own event ideas, objectives, and organizational needs.

3.C  Segmenting Your Approach to Donors for Better Results
   David Allen - Consultant - Development for Conservation  david@developmentforconservation.com
Segmenting is something we do intuitively. We don't send grant requests to individuals. We don't send special appeal letters to the US Fish & Wildlife Service. And we don't send renewal notices to people who have never given money. Organizations segment their donors because the approach to each segment should be different. Organizations segment their donors in planning to make those differences intentional.

   As conservation organizations grow, they become increasingly sophisticated in this segmentation, commonly by separating out “major donors” first. More established organizations might segment by giving potential, geography, interest, or currency (how recently they may have given). This workshop will explore how to start thinking about segmenting your approach to donors to get better results and raise more money.
The Trust for Public Land is happy to be expanding its Climate-Smart Cities program in Rhode Island. For more information contact Kevin Essington at kevin.essington@tpl.org.

CLF protects New England’s environment for the benefit of all people. We use the law, science and the market to create solutions that preserve our natural resources, build healthy communities, and sustain a vibrant economy.

The biennial gathering of people shaping a stronger, more vibrant and sustainable Rhode Island

3.D Putting Together a Land Conservation Deal

Reggie Hall - The Conservation Fund  rhall@conservationfund.org
This introductory overview workshop will explore real estate transactions from the initial conversation with a landowner to the party celebrating the completion of the project. Emphasis will be on exploring best practices in the field while connecting the steps of sound real estate transactions as highlighted by LTA’s Standards & Practices.

3.E Board Boot Camp 301: Board Culture and Keeping the Board Engaged

Abigail Brooks - Sakonnet Preservation Association  abigail@ntlong.com
Chuck Allott - Aquidneck Land Trust  callott@ailt.org
Land trusts of every shape and size face the challenge of building an effective and engaged board of directors. It can be difficult to resist the temptation to take another “warm body” when filling an open board seat but the benefits of being thoughtful about board recruitment, orientation and evaluation are worth the effort. This workshop will share tools, resources and ideas to engage and support a positive board culture. This information will be useful to Board Members of any conservation organization.

3.F Resilience Tools for Communities: PREP-RI, STORMTOOLS & more

Pam Rubinoff - URI Coastal Resources Center/RI Sea Grant  rubinoff@uri.edu
Teresa Crean - URI Coastal Resources Center/RI Sea Grant  tcrean@crc.uri.edu
Michael DeLuca - Town of Narragansett  mdeluca@narragansettri.gov
This workshop provides an overview of the PREP-RI (Providing Resilience Education for Planning in Rhode Island) online training and mapping tools developed to increase the capacity of municipal decision makers to make effective choices supporting resilience to the impacts from flooding, sea level rise and erosion. Considering current and future impacts helps shape decisions that enhance the health, safety, and welfare of Rhode Island’s communities. Attendees will be introduced to the suite of tools with local case studies illustrating how the information is being put to use in Rhode Island municipalities.

3.G Land Use and Advocacy 101

Maria Mack - South Kingstown Planning Board  cfin@cox.net
Nancy Letendre - Town of Westerly Planning & Zoning Board Solicitor  nancyletendreesq@gmail.com
Are you frustrated by a loss of ‘sense of place’ and quality of life in your community? Do you worry that suburban sprawl is encroaching upon your town? Is it possible to help shape policy that will preserve the special places and natural resources in your town? Yes! Come to this session to learn how to make a difference at the local and State level.

3.H Manage Forests While Mitigating Climate Change

Paul Dolan - RC&D & RI Conservation Districts  rircd2283@gmail.com
Scott Millar - Grow Smart RI & RI Conservation Districts  smillar@growsmartri.com
Large landowners have an important role in mitigating climate change. This workshop will share strategies for reforestation, avoiding forest loss and best practices for improved forest management. Well managed Rhode Island forests could cost-effectively remove 7 billion tons of carbon dioxide annually by 2030.
Proudly serving our clients as we care for our community, Handy Law, LLC provides trusted counsel on energy, environmental, real estate, dispute resolution and business matters.

www.handylawllc.com
3.I Creating and Maintaining Woodland Trails

Garry Plunkett - Tiverton Open Space Commission  gplunkett@cox.net

Woodland trails should offer visitors an authentic nature experience while protecting the ecosystem that has been preserved. Designing, building, then maintain trails that accomplish this goal must often be done with limited resources. This workshop will share lessons learned – both mistakes and successes – from 25 years of trails development and stewardship with the Tiverton Open Space Commission and Tiverton Land Trust. The workshop will include principles of trail design and construction, signage, ongoing maintenance, and working with volunteers.

3.J Protecting Riparian Corridor Connectivity Using Wetland Reserve Easements

Brunilda Velez - Natural Resource Conservation Service  brunilda.velez@ri.usda.gov
Joe Bachand - Natural Resource Conservation Service  joseph.bachand@ri.usda.gov

Natural Resources Conservation Service will provide an overview of how to use the Agricultural Conservation Easement Program Wetland Reserve Easements to create protected riparian corridors that benefit wildlife and wildlife movement. The Wetland Reserve Easements are used on private lands to protect and restore wetlands.
Thank you for protecting Rhode Island’s land and water.

Bradford Dam Removal Project, October, 2017

We are proud to support innovative partnerships like the Conservation Stewardship Collaborative, projects like the Bradford Dam removal, and the coalitions that are tackling critical issues like storm water management.

RHODE ISLAND FOUNDATION

rifoundation.org
Keeping your farm and woods healthy just got easier.

The Natural Resources Conservation Service (NRCS) provides conservation planning and financial and technical assistance for—

- Farm and/or Forest Management Plans
- Seasonal high tunnels
- Pollinator habitat
- Manure management
- Farm energy audits
- Preventing soil erosion
- Enhancing woodlands
- Improving pasture land
- Improving water quality
- Protecting and enhancing wildlife habitats

…and more!

We’ll help you find the best programs to fit your conservation needs—
